To Our Valued Distributors,

Based on the lack of resources and availability of Polypropylene (PP) Strapping, Polyester (PET) Strapping, and related accessories, QSPAC Industries will no longer offer this product segment.

It has always been our goal to supply our distributors with packaging commodities to fill the needs of your customers. When availability and delayed backorders become an ongoing problem, we look for alternative sources for supplies. With this product segment, we are not confident in meeting your needs.

We will continue to offer hand tools, consisting of crimpers and tensioners for poly and steel strapping. This is a product line we have direct control of keeping inventory on the floor.

We appreciated your continued business and understanding in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joe Tang', with a horizontal line above it.
